MARITIME SECURITY ACT

Meeting National Sealift Needs

The Maritime Security Act will protect American jobs and maintain a U.S. presence in international maritime trade, ensuring that vital imports and exports are delivered in both peacetime and wartime. The act reaffirms our Nation's resolve to maintain a strong U.S.-flag presence on the high seas for our continued national security and economic growth.

President Bill Clinton October 8, 1996

U.S. Department of TransportationMaritime Administration

Sealift America's Maritime Heritage

The United States has three main sources of sealift vessels to carry military supplies and cargo to support the nation's armed forces:

- 1. Department of Defense sealift ships kept fully loaded with military material, and fully crewed at all times, ready to embark immediately to a war zone.
- 2. Stand reserve ships operated by the Department of Transportation's Maritime Administration, available to load military cargoes within 4 to 20 days' notice.

The American flag must always sail in the sea lanes of the world.

President Bill Clinton October 8, 1996

3. U.S.-flag merchant ships, normally operated in commercial service but available when needed to service national defense needs. These ships would carry cargo such as ammunition, tanks, military equipment, vehicles, spare parts and food, needed to sustain the deployment of American armed forces.

The Bush Administration and the Clinton Administration both proposed legislation to be sure the nation will continue to have a fleet of commercial cargo vessels available to carry sustainment cargo to support U.S. Military forces. U.S.-flag merchant ships are owned by the U.S. citizens and crewed by loyal American citizen seafarers.

The Administration's new Maritime Security Program is designed to provide sustainment sealift for national emergencies at minimal cost.

Under the Maritime Security Program (MSP), the Government contracts with the owners of U.S.-flag commercial ships for service when needed for national emergencies or war. This approach avoids the need to spend billions of dollars to acquire additional cargo ships dedicated solely to carrying military cargoes, and the millions of additional dollars required to maintain more standby vessels.

The MSP maintains a modern U.S.-flag fleet providing military access to vessels and vessel capacity, as well as a total global, intermodal transportation of network. This network includes not only vessels, but logistic management services, infrastructure, terminal and

equipment, communications and cargotracking networks, 20,000 well-trained, professional U.S. citizen seafarers, and 22,000 shoreside employees located throughout the world.

MSP Participants American Ship Management, LLC 9 vessels American International Car Carrier, Inc. 3 vessels Central Gulf Lines, Inc. 3 vessels E-Ships, Inc. 3 vessels First American Bulk Carrier Corp. 2 vessels First Ocean Bulk Carrier I. II. III. LLC 3 vessels Maersk Line, Limited 4 vessels OSG Car Carriers, Inc. 1 vessel U.S. Ship Management, Inc. 15 vessels Waterman Steamship Corp. 4 vessels Total 47 vessels

The ship capacity and associated intermodal capabilities of the MSP vessels are enrolled in the new sealift Emergency preparedness Program, The Voluntary Intermodal Sealift Agreement (VISA).
